

QUALITY CONSULTING

**Your Gateway to the
Brazilian Photovoltaic Market**

DWL Quality Consulting has been a pioneering force in regulatory compliance for over a decade. Established at the inception of Brazil's regulatory standards, we have a proven track record of assisting foreign manufacturers in successfully entering the Brazilian market. Our expertise primarily serves manufacturers in Asia, and our extensive experience ensures that we can navigate the complexities of local regulations with precision and efficiency.

Our Services for Photovoltaic Equipment Manufacturers

With the recent implementation of Ordinance 140/22, the Brazilian market for photovoltaic equipment is poised for significant growth. This new regulation expands the range of photovoltaic equipment that will be evaluated and receive the INMETRO - Brazilian regulatory authority - seal, presenting a substantial opportunity for manufacturers. DWL Quality Consulting is here to facilitate your entry and success in this burgeoning market.

Why Choose DWL Quality Consulting?

- **Regulatory Compliance Expertise:** We ensure your products meet all regulatory requirements set by Brazilian authorities, allowing for a smooth market entry.
- **Declaration of Supplier Conformity:** We handle the issuance of the Declaration of Conformity, a mandatory document for your product to obtain an import license.
- **INMETRO System Management:** Our team operates within the INMETRO system (Orquestra platform), ensuring all necessary registrations or certifications are completed accurately and efficiently.
- **Local Laboratory Liaison:** We facilitate connections with accredited Brazilian laboratories for product testing and validation, streamlining the compliance process.

Our Process

1. **Initial Consultation:** We begin with a thorough understanding of your product and regulatory needs.
2. **Regulatory Assessment:** Our experts conduct a comprehensive assessment of the regulatory requirements relevant to your products.
3. **Documentation and Certification:** We manage all documentation, registration processes, and ensure compliance with Brazilian standards.
4. **Market Entry Support:** We provide ongoing support to address any regulatory updates and maintain compliance, ensuring your products remain competitive in the market.
